SUMMARY

Software Developer with 2+ years of professional experience in full-stack web application development, specializing in Next.js, React, TypeScript, Go, Node.js, and MongoDB. Hands-on experience building RAG pipelines, LLM-powered applications, and AI agent workflows using Claude, LangGraph, and vector databases. Experienced in delivering scalable, real-time applications with RESTful and GraphQL APIs in Agile environments. Holds a Master's degree in Artificial Intelligence and IoT.

PROFESSIONAL EXPERIENCE

RV Connex Co. Ltd. [Cynclair] Jun. 2024 – Present
Software Developer Thailand

- Full-stack developer for **AZURITES OpenXDR**, an enterprise cybersecurity threat detection and incident response platform.
- Built an **AI-powered SOC investigation service** using Python, FastAPI, and AWS Bedrock to convert raw security alerts into structured investigation outputs including findings, risk verdicts, and remediation guidance.
- Implemented **LLM-driven analysis workflows** with prompt engineering, response structuring, and reliability controls to generate explainable incident reports supporting analyst decision-making.
- Developed context-aware threat correlation combining real-time incidents with historical security data via **GraphQL and Neo4j**, improving triage quality and chatbot-assisted investigations.
- Built and maintained frontend and backend features using **Next.js, React, TypeScript, Node.js, and GraphQL**; integrated scalable APIs maintaining **99.9% uptime**.
- Improved GraphQL querying and caching with **Apollo Client and React Query**, **reducing data load times by 45%**; converted legacy SCSS to Tailwind CSS, **reducing UI code complexity by 40%**.
- Enhanced UI responsiveness across desktop, tablet, and mobile, **improving usability scores by 30%+**; designed dashboards, charts, and alert views for real-time security data.
- Contributed to code reviews, CI/CD flow improvements, and maintained clean Git workflows in an Agile team.

Mercantile Office System Pvt. Ltd. Jan. 2022 – Jul. 2022
Software Program Trainee Nepal

- Implemented **CI/CD pipelines** automating software integration, testing, and deployment, **reducing release cycle time by 20%**.
- Managed secure data storage, backup, and recovery processes aligned with Agile methodology.
- Conducted thorough testing and debugging to meet client requirements; facilitated communication between clients and development teams.

Online Saathi Pvt. Ltd. / Leapfrog Technology Inc. Feb. 2021 – Nov. 2021
Intern Web Developer / Microsoft Power Platform Trainee Nepal

- Converted UI/UX designs into pixel-perfect, responsive websites using HTML, CSS, and JavaScript.
- Gained hands-on experience with Microsoft Power Platform tools; collaborated with cross-functional teams to deliver projects on schedule.

PROJECTS

CodeSense AI – AI Codebase Assistant | *Python, FastAPI, LangGraph, Claude, Pinecone, Voyage AI, Next.js, TS* GitHub

- Built a full-stack AI tool that ingests a ZIP or GitHub repo and enables code browsing, natural language Q&A, and AI-driven analysis; parsed Python, JavaScript, TypeScript, and Go with **Tree-sitter** into function/class chunks preserving line numbers.
- Embedded code chunks with **Voyage AI** (`voyage-code-3`) into **Pinecone** (one namespace per repo); implemented **RAG Q&A** where Claude answers from top-5 retrieved chunks with the UI jumping to and highlighting cited lines.

- Designed **three LangGraph agents** with Pydantic-validated structured output: code reviewer (issues with severity and line numbers), docs generator (map-reduce README or per-file docstrings), and architecture analyzer (components, dependencies, Mermaid diagrams).
- Handled embedding rate limits with a sliding-window limiter (RPM and TPM) and token-aware batching; moved embedding to a background task with `PENDING` → `INGESTED`/`FAILED` polling, enabling reliable operation on the free tier.
- Built the **Next.js 16 + React 19 + TypeScript** dashboard with Shiki-highlighted code viewer, chat with clickable sources, agent panel, and repo management — all data fetching via **TanStack Query**.

AI Document RAG & Resume ATS Platform | *Go, React, Pinecone, Claude, PostgreSQL, AWS, Docker* GitHub Live

- Built a full-stack **RAG platform in Go** that extracts and chunks uploaded PDFs, embeds them with Voyage AI, stores vectors in **Pinecone**, and generates grounded answers with **Claude** constrained to retrieved context.
- Architected a three-store backend — **PostgreSQL** for metadata, **AWS S3** for raw files, **Pinecone** for embeddings — exposed via a Chi HTTP API with CORS, health checks, and a multi-stage Docker build.
- Developed an **ATS resume toolkit** using Claude to extract keyword profiles, score resumes against job descriptions, generate cover letters, and produce tailored LaTeX resumes.
- Built a **React 19 + TypeScript** frontend with live LaTeX-to-PDF compilation, color-coded JD match scoring, and a responsive two-pane workspace.

Real-Time Restaurant Management System | *Next.js, Node.js, Express, MongoDB, Socket.IO, Redux* GitHub

- Designed and developed a full-stack real-time restaurant management platform streamlining coordination between customers, staff, and admins using Next.js, Node.js, Express, and MongoDB.
- Implemented real-time order processing and notifications with **Socket.IO**; delivered an analytics dashboard with **React Query, Material UI, and Chart.js** covering revenue trends and order volume.
- Engineered **JWT-based RBAC authentication** with HTTP-only cookies; improved state management with **Redux Toolkit** and mobile-first responsive layouts.

EDUCATION

Sirindhorn International Institute of Technology (SIIT), Thammasat University 2022 – 2024
Master of Engineering in Artificial Intelligence and Internet of Things Thailand

- **Scholarship**: Fully funded TISR scholarship in partnership with SIIT, TU, NSDTA, and Tokyo Tech.

Guru Nanak Institute of Technical Campus (GNITC), JNTUH 2016 – 2020
Bachelor of Technology in Computer Science Engineering Hyderabad, India

TECHNICAL SKILLS

Languages : Python, JavaScript (ES6+), TypeScript, Go (Golang), SQL, C#, C

AI / ML : RAG, LLM Integration, LangGraph, LangChain, Prompt Engineering, Anthropic Claude API, AWS Bedrock, Vector Databases (Pinecone), Embeddings (Voyage AI), n8n

Frontend : React.js, Next.js, Redux, Zustand, TanStack Query, Tailwind CSS, Material UI, Bootstrap

Backend : Node.js, NestJS, Express.js, FastAPI, Go (Chi), REST APIs, GraphQL, WebSockets, Apollo

Databases : PostgreSQL, MongoDB, MySQL, Redis, Pinecone, Neo4j

Cloud & DevOps : AWS (S3, Bedrock), Google Cloud Platform, Docker, Git, CI/CD

Tools : Postman, VS Code, Power BI, Tableau, Microsoft 365

CERTIFICATIONS

AWS Certified Developer – Associate *Nov. 2025*
Claude with the Anthropic API – Anthropic *Apr. 2026*
Google Data Analytics Professional Certificate – Google *Dec. 2022*
Application of AI, Machine Vision, and Robotics *Aug. 2021*
Certificate of Participation in Codegoda *2023*
